

## GEOSPATIAL DATA MANAGEMENT

### Project Topic:

Implementation of a database system of Hacettepe University Geomatics Engineering Department (Guide App)

## GUIDELINES

- 1)Creating a database and table via PostgreSQL DBMS.
- 2)Creating a localhost site with gathering informations from our DBMS and linking this project to a web-based Project.
- 3)Writing html codes with php for the website.

## NEEDED PROGRAMS FOR THE PROJECT

□ PostgreSQL □ XAMPP □ Apache Web Server □ Visual Studio Code

Firstly,to make a clean start I created a scheme and a flowchart that I will use as tables in PostgreSQL.

Sequences

	id	username	password
	[PK] integer	character varying (50)	character varying (50)
1	1	admin	123

I created a database in PostgreSQL named guideApp\_DB. And then I created an admin table. We added id, username and password also. The main goal for the admin panel was to control who can add, delete or change data after the creation of a web-based system.

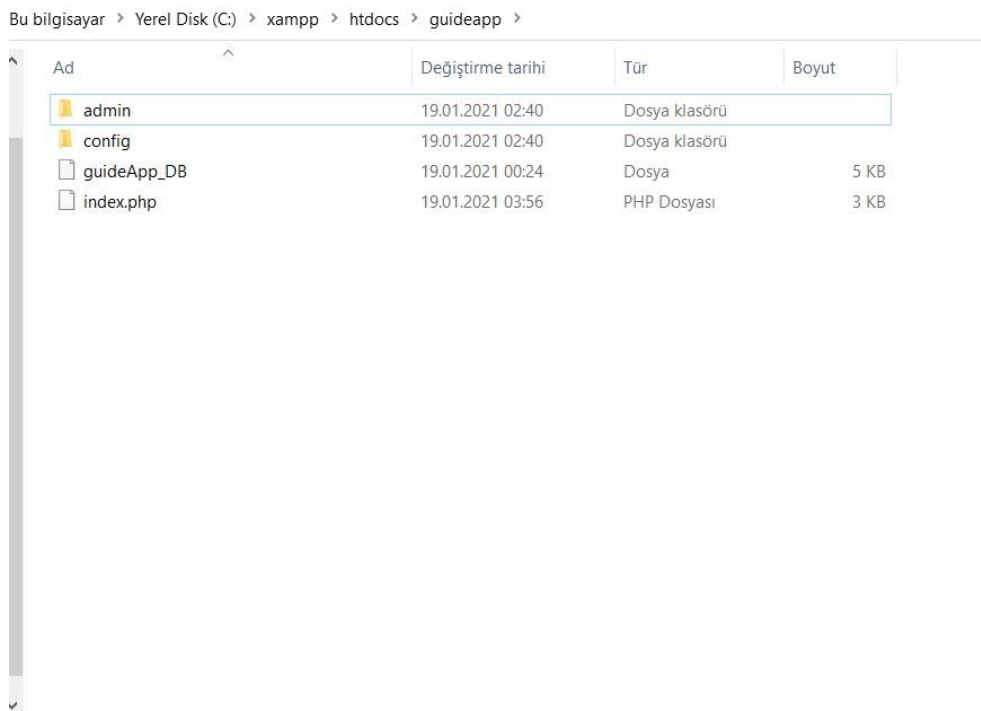

After, I created a table named teacher to add the people to our database for those who work at the Hacettepe University Geomatics Engineering Department.

	id [PK] integer	name character varying	surname character varying (50)	telephone_number character (11)	address character varying (300)	mail character varying (50)	department character varying (70)	degree character varying (30)
1	7	Berk	Anbaroğlu	05458965125	Çayyolu	banbar@gmail.com	1	Dr.
2	8	Cevdet Coşkun	Aydın	05412354856	Keçiören	ceaydin@hacettepe.edu.tr	1	Lecturer
3	9	Mustafa	Türker	05384562315	Ümitköy	mturker@hacettepe.edu.tr	1	Professor
4	10	Kamil	Teke	05215698456	Konutkent	kteke@hacettepe.edu.tr	1	Dr.
5	11	Gonca Okay	Ahi	05354568725	Elvankent	goncaokayahi@hacettepe.e...	1	Dr.
6	12	Berkay	Bahadır	05485623541	Eryaman	berkaybahadur@hacettepe.e...	1	Research Assistant
7	13	Azer	İlgar	05454125687	Batıkent	ilgar@hacettepe.edu.tr	1	Research Assistant
8	14	Selin	Ökdem	05415698456	Yenimahalle	celine@hacettepe.edu.tr	1	Secretary
9	15	Raziye	Arslan	05395468210	Altındağ	rarslan@hacettepe.edu.tr	1	Computer Operator
10	16	Kemalettin	Öztaş	05458456532	Atapark	koztas@hacettepe.edu.tr	1	Tecnician
11	17	Hüseyin Emre	Abaoğlu	05458413298	Anıttepe	emreabaogluu@gmail.com	1	Student
12	18	Zeynep	Esirgenci	05384562138	Yenimahalle	zeynepesirgenci@gmail.com	1	Student
13	19	Abdülkadir Baki	Erbaş	0532456850	Yaprıcak	abakierbas@gmail.com	1	Research Assistant

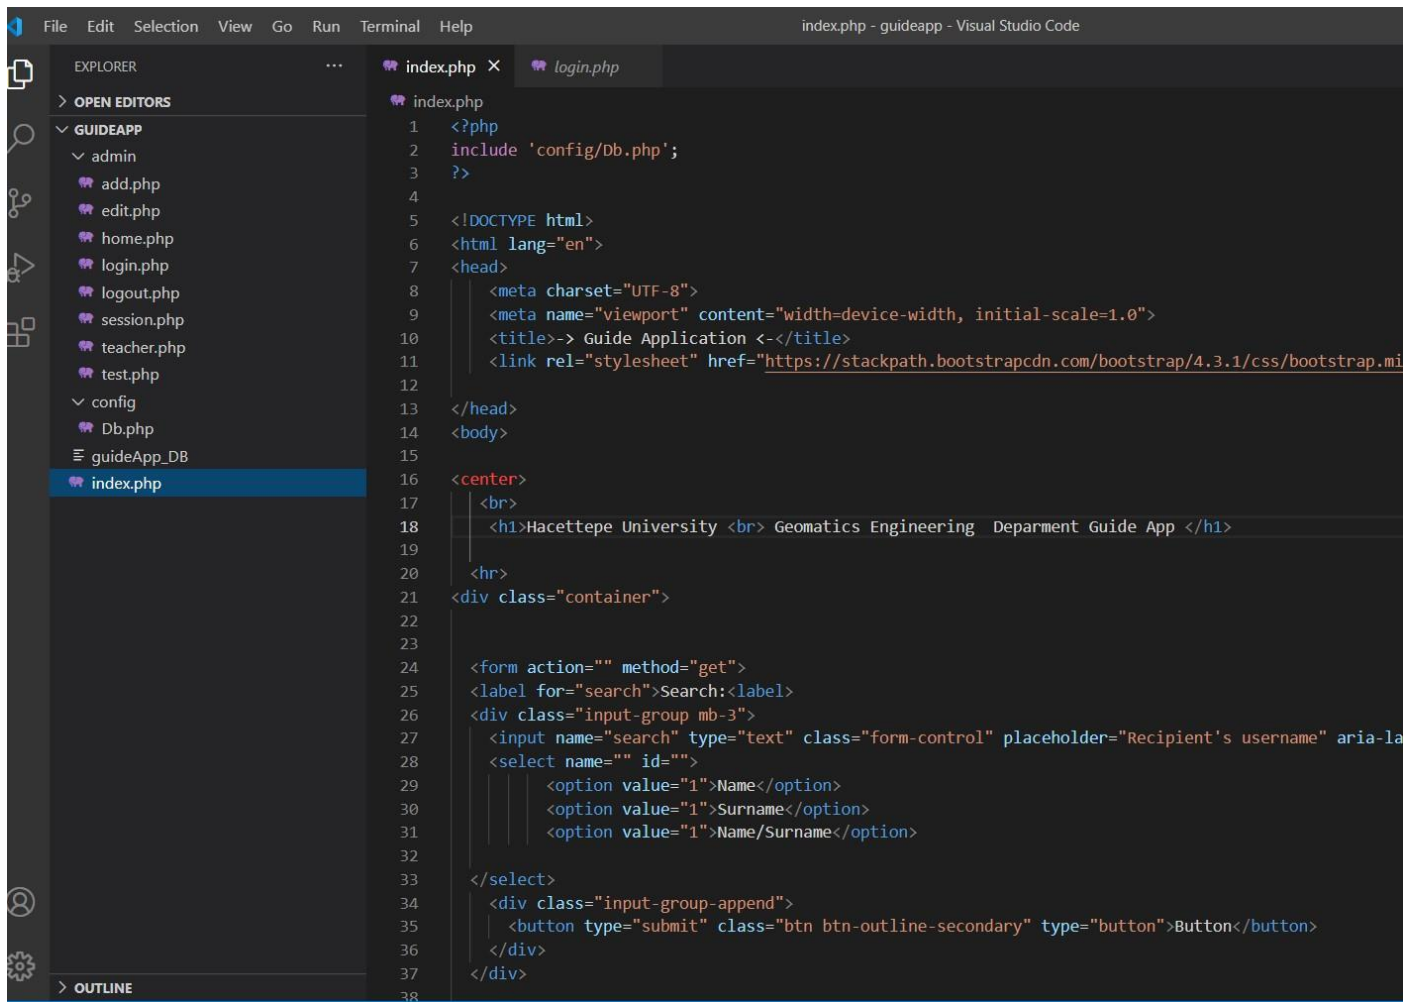

Then, I installed a control panel named XAMPP. It is a web server solution stack package consisting Apache, MariaDB etc..

With this program when I activate Apache module and write localhost/guideapp the web-site works successfully.

I created a folder named GuideApp and then added admin,config and index folder for the creation of the web-site with php programming language via Visual Studio Code.

```
1 <?php
2 include 'config/Db.php';
3 ?>
4
5 <!DOCTYPE html>
6 <html lang="en">
7 <head>
8   <meta charset="UTF-8">
9   <meta name="viewport" content="width=device-width, initial-scale=1.0">
10  <title>-> Guide Application </title>
11  <link rel="stylesheet" href="https://stackpath.bootstrapcdn.com/bootstrap/4.3.1/css/bootstrap.min.css">
12
13 </head>
14 <body>
15
16 <center>
17   <br>
18   <h1>Hacettepe University <br> Geomatics Engineering Department Guide App </h1>
19
20   <br>
21 <div class="container">
22
23
24   <form action="" method="get">
25     <label for="search">Search:<label>
26     <div class="input-group mb-3">
27       <input name="search" type="text" class="form-control" placeholder="Recipient's username" aria-label="Text input" />
28       <select name="" id="">
29         <option value="1">Name</option>
30         <option value="1">Surname</option>
31         <option value="1">Name/Surname</option>
32       </select>
33     </div>
34     <div class="input-group-append">
35       <button type="submit" class="btn btn-outline-secondary" type="button">Button</button>
36     </div>
37   </div>
38
```

For the Apache module to understand that the needed codes are written in php language we opened php tags for both the start and the end of the code.

After that,I created config.php and wrote php codes to get the datas from PostgreSQL and not to write it every time when we needed to get the information from DBMS.

```
config > Db.php
1  <?php
2
3  try {
4
5      $db = new PDO('pgsql:host=localhost;dbname=guideApp_DB', 'postgres', '123');
6
7  } catch(PDOException $e) {
8      echo 'Connection Error: ' . $e->getMessage();
9  }
10
11
12
```

As you can see from above,you need the database guideApp\_DB imported to your DBMS to start the localhost/guideapp.

14	Selin	Ökdem	Secretary	1	05415698456	celine@hacettepe.edu.tr	Selin	Yenimahalle
15	Raziye	Arslan	Computer Operator	1	05395468210	rarslan@hacettepe.edu.tr	Raziye	Altındağ
16	Kemalettin	Öztaş	Tecnician	1	05458456532	koztas@hacettepe.edu.tr	Kemalettin	Atapark
17	Hüseyin Emre	Abaoğlu	Student	1	05458413298	emreabaogluu@gmail.com	Hüseyin Emre	Anıttepe
18	Zeynep	Esirgenci	Student	1	05384562138	zeynepesirgenci@gmail.com	Zeynep	Yenimahalle

You can see the final version of our app from above.To create a good look for the design i used to BootStrap Library

```
index.php X Db.php
index.php
1  <?php
2  include 'config/Db.php';
3  ?>
4
5  <!DOCTYPE html>
6  <html lang="en">
7  <head>
8      <meta charset="UTF-8">
9      <meta name="viewport" content="width=device-width, initial-scale=1.0">
10     <title>-> Guide Application <-</title>
11     <link rel="stylesheet" href="https://stackpath.bootstrapcdn.com/bootstrap/4.3.1/css/bootstrap.min.css" integrity="sha384-ggOyR0iXCbMQ
12
13 </head>
14 <body>
15
```

□ Head part of the index code.

Also when you write <http://localhost/guideapp/admin/> it allows you to add teacher and automatically syncs the datas with the PostgreSQL at the same time.
